

# BR-AJC-M

**Upgrade your existing BR/BRT chuck to a quick jaw change chuck.**

Simply replace T-nuts on the BR/BRT chuck with the special T-nuts while leaving the main body and soft jaws as they are, **eliminating the need to align the serrations** when replacing the jaws.

**No jaw reforming required** when replacing jaws.

The positioning nut hits the master jaw end and the jaw stops at the preset serration position.

## Dedicated T-nuts

- No mistakes in installing the serration position
- Gripping accuracy is 0.01mm T.I.R.\*
- The gripping accuracy is 0.01mm T.I.R.\* even when the jaws are detached and attached.
- Compatible with all BR/BRT06 to 12 inches

\*For BR/BRT12, the gripping accuracy is 0.015mm T.I.R.
